- 🧠 Psychology of behavioral safety and risk tolerance
- 📁 Research & case studies on personality risk assessments
- 🛠️ SafeSELF Action Plan
- 💡 Individual and group exercise

WHAT YOU WILL LEARN

- 🔍 The root cause for human error
- 🧠 The personality types that can contribute to safety risk
- 🛠️ How to manage the personality of oneself and others to reduce risk

WHAT PEOPLE ARE SAYING ABOUT THE SQ™

"We have been extremely pleased with the SQ™ assessment. It's quick and easy to use, but most importantly it works. Our injury rate has dropped 80% over the past two years, and that is in part due to the SQ™... I'd recommend it for any progressive leader looking for gains in their safety program."

CHRIS HAYMAN, PRESIDENT AMERICAS, EMECO GROUP

"I'd rate TalentClick a 10 out of 10. The product is great!"

VICE PRESIDENT HR, GLOBAL INDUSTRIAL COMPANY

"These reports exceeded our expectations. They were spot on...very insightful."

PRINCIPAL, LARGE REGIONAL UTILITY COMPANY

WHAT IS THE SAFETY QUOTIENT™

The Safety Quotient™ is a psychometric tool being used to assess an individual's "default settings" and measures personality traits correlated with human error. The SQ™ is proven to reduce incidents by up to 20% in most companies. After completing the online assessment, each participant will receive one or both of the following reports:

Illustrates which workers are more likely to be rule-resistant, distractible, impulsive, irritable, and more.

Gives leaders practical, actionable advice for coaching "Higher-Risk" employees.

Includes a SafeSELF Action Plan for self-awareness and changing one's own behaviors
