Part 1 – Assessment Results on the Management Competencies

The following pages are the compiled results based on the responses from the rating questionnaires that you and your raters completed about your behaviors related to management competencies. Beginning on the next page, your results on the management competencies are listed, each indicating your self-rating, the average of your raters' responses, and the organizational average for each competency.

Your results are reported on a 5-point scale, with each number corresponding to the extent to which you are viewed to behave in accordance to the competency measured in the scale. The numbers in the scale represent the following statements:

- 1 - Does not describe you at all**
- 2 - Describes you *to a slight extent***
- 3 - Describes you *to a moderate extent***
- 4 - Describes you *to a great extent***
- 5 - Describes you *to a very great extent***

Your results are presented in three different ways:

-  **Self-Rating:** The self-rating is derived from your responses to the self-report questionnaire. This bar represents how you view yourself.
-  **Raters' Average:** The raters' average is derived from your raters' responses to the rater's questionnaire. This bar represents how your raters view you.
-  **Organizational Average:** The organizational average is derived from the compilation of all the ratings of people from your organization who have undergone this assessment. This bar represents the typical rating of someone from your organization.

Gaps between your self-rating scores and your rater's average scores on a certain competency indicate the differences between your perception of yourself and your raters' perception of you in this area. Gaps of 1.0 point or more are considered significant and should be noted.

Gaps between your raters' averages and the organizational averages on a certain competency indicate how your raters' assessment of you compares to the average score of all the people from your organization who have undergone this assessment. Gaps of 1.0 points or more are considered significant and should be noted.
